Pharmaceutical Foils

Pharmaceutical foils are used primarily for blister and strip packaging of pharmaceutical tablets, capsules, and other drug products. They serve as a barrier to light, moisture, oxygen, and other external elements, ensuring the protection and extended shelf life of medicines.

Our Pharmaceutical Foils Include:

- **Blister Foil**
- **Strip Pack Foil**
- **Cold Forming Foil (Alu-Alu Foil)**
- **Child-Resistant Foil**

Key Uses & Applications

- Blister packs for tablets and capsules
- Strip packs for capsules and pills
- Aluminium-Aluminium (Alu-Alu) packaging for sensitive drugs
- Child-resistant packs for safety

Why Our Pharmaceutical Foils?

- **High-quality,** pharma-grade Aluminium Foil
- **Printing inks** for vibrant and clear printing
- **Heat-Sealable Lacquers** for sealing
- **Adhesives** for bonding layers of foil

Raw Materials & Production

- High-quality, pharma-grade **Aluminium Foil**
- Printing Inks for vibrant and-clear printing
